Book Review - Green Acraeges Guide: Stewardship for Small Acraeges

Posted: October 4, 2012

Green Acraeges Guide: Stewardship for Small Acraeges
 By Amrita Grewal (Lead Author)
 Published by The Land Stewardship Centre, Edmonton, AB
 \$29.95, Workbook

By Celleidh Sager

Green Acraeges Guide: Stewardship for Small Acraeges provides prospective and current Canadian hobby farm and acreage owners with guidelines for developing and carrying out management practices to preserve and defend the quality of their land and surrounding natural resources, including air, water, and wildlife.

The guide introduces readers to pertinent land and resource practices, explaining how the actions of every acreage owner have a significant impact on the Canadian landscape. A

series of questionnaires, worksheets, and graphs help property owners assess their stewardship practices and set long and short-term goals for their property.

The section on range and pasture management will be of particular interest to horse owners concerned with maintaining eco-friendly practices. Though this handbook specifically focuses on Alberta's bylaws and topography, the land management suggestions and worksheets would be useful for any Canadian property owner.

Green Acraeges Guide is written in a straight forward, scientific manner that is easy to follow. This comprehensive workbook is practical and scrupulous, and highly recommended for all those who are concerned with preserving the quality of their property and its natural resources.

For more information, or to purchase *Green Acraeges Guide*, visit www.landstewardship.org.
